🔍 Search Operators

Operator	Description	Syntax	Example
()	Group multiple terms or operators. Allows advanced expressions	(or)	inurl:(html | php)
*	Wildcard. Matches any word		How to * a computer
""	The given keyword has to match exactly. *case-insensitive*	""	"google"
m..n / m...n	Search for a range of numbers. *n* should be greater than *m*	..	1..100
-	Documents that match the operator are excluded. *NOT-Operator*	-	-site:youtube.com
+	Include documents that match the operator	+	+site:youtube.com
|	Logical *OR-Operator*. Only one operator needs to match in order for the overall expression to match	|	"google" | "yahoo"
~	Search for synonyms of the given word. Not supported by Google	~	~book
@	Perform a search only on the given social media platform. Rather use **site**	@	@instagram
after	Search for documents published / indexed after the given date	after:<yy(-mm-dd)>	after:2020-06-03
allintitle	Same as **intitle** but allows multiple keywords seperated by a space	allintitle:	allintitle:dog cat
allinurl	Same as **inurl** but allows multiple keywords seperated by a space	allinurl:	allinurl:search com
allintext	Same as **intext** but allows multiple keywords seperated by a space	allintext:	allintext:math science university
AROUND	Search for documents in which the first word is up to *n* words away from the second word and vice versa	AROUND()	google AROUND(10) good
author	Search for articles written by the given author if applicable	author:	author:Max

Operator	Description	Syntax	Example
before	Search for documents published / indexed before the given date	before:<yy(-mm-dd)>	before:2020-06-03
cache	Search on the cached version of the given website. Uses Google's cache to do so	cache:	cache:google.com
contains	Search for documents that link to the given fileype. Not supported by Google	contains:	contains:pdf
date	Search for documents published within the past *n* months. Not supported by Google	date:	date:3
define	Search for the definition of the given word	define:	define:funny
ext	Search for a specific filetype	ext:	ext:pdf
filetype	Refer to **ext**	filetype:	filetype:pdf
inanchor	Search for the given keyword in a website's anchors	inanchor:	inanchor:security
index of	Search for documents containing direct downloads	index of:	index of:mp4 videos
info	Search for information about a website	info:	info:google.com
intext	Keyword needs to be in the text of the document	intext:	intext:news
intitle	Keyword needs to be in the title of the document	intitle:	intitle:money
inurl	Keyword needs to be in the URL of the document	inurl:	inurl:sheet
link / links	Search for documents whose links contain the given keyword. Useful for finding documents that link to a specific website	link:	link:google
location	Show documents based on the given location	location:	location:USA
numrange	Refer to **m..n**	numrange:-	numrange:1-100
OR	Refer to **|**	OR	"google" OR "yahoo"
phonebook	Search for related phone numbers associated with the given name	phonebook:	phonebook:"william smith"
relate / related	Search for documents that are related to the given website	relate:	relate:google.com
safesearch	Exclude adult content such as pornographic videos	safesearch:	safesearch:sex
source	Search on a specific news site. Rather use **site**	source:	source:theguardian
site	Search on the given site. Given argument might also be just a TLD such as **com, net**, etc	site:	site:google.com
stock	Search for information about a market stock	stock:	stock:dax
weather	Search for information about the weather of the given location	weather:	weather:Miami

🔧 URL Modifiers

Add at the parameter at the end of the SERP (Search Engine Result Pages) URL.

Modifier	Description	Parameter	Example
