Room completed (100%)

I would have never been able to create this room the way I had imagined it. So thank you sir.

Also credit goes to Sq00ky for the super special idea found in the initial foothold stage (not going to give any spoilers away!)

Please allow 3-5 minutes for the box to fully deploy once you hit the "Deploy" button.

I encourage you to approach this challenge as an actual penetration test. Consider writing a report, to include an executive summary, vulnerability and exploitation assessment, and remediation suggestions, as this will benefit you in preparation for the eLearnSecurity Certified Professional Penetration Tester or career as a penetration tester in the field.

Note - Nothing in this room requires Metasploit

Machine may take up to 5 minutes for all services to start.

****Writeups will not be accepted for this room.****
